

EDUCATION

- **Gujarat University** Ahmedabad, Gujarat
Master of Science in Information Technology (Cybersecurity and Cloud) Pursuing
- **Gujarat University** Ahmedabad, Gujarat
Bachelor of Science in Information Technology; (Cybersecurity and Cloud) June 2023 – April 2026
- **Seventh Day Adventist Higher Secondary School** Ahmedabad, Gujarat
Secondary and Higher Secondary Schooling June 2008 – April 2022

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (SAA-C03)** 2023
IONX Institute
- **CCNA 200-301 – Cisco Certified Network Associate** 2023
IONX Institute
- **Cyber Security Expert** 2023
IONX Institute

INTERNSHIP

- **Grass IT Solutions** Ahmedabad, Gujarat
DevOps Cloud Engineer March 2026 – May 2026
 - **AWS Infrastructure:** Built and managed cloud environments using EC2, S3, VPC, IAM, and Route 53 while following industry-standard deployment practices.
 - **DevOps Tooling:** Utilized Git, Docker, Jenkins, Terraform, and Linux to automate deployments and streamline infrastructure management workflows.
 - **Monitoring & Troubleshooting:** Diagnosed and resolved infrastructure, networking, and application-level issues across cloud-based environments.

PROJECTS

- **Zenith Edge – Cloud-Based Client Management Platform**
 - Built and deployed multiple React-based applications including an onboarding portal, admin dashboard, client statement viewer, and landing website.
 - Integrated Google Apps Script webhooks, automated email notifications, and cloud-hosted workflows for client onboarding and reporting.
 - Managed application deployment, security controls, and production hosting using Netlify and modern web development practices.
- **AWS Cloud Resume Challenge**
 - Designed and deployed a cloud-hosted resume website using AWS services including S3, CloudFront, Route 53, and IAM.
 - Implemented visitor tracking and backend integrations using serverless cloud components.
 - Applied cloud security, DNS management, and infrastructure deployment best practices throughout the project lifecycle.
- **CI/CD Pipeline Automation Project**
 - Containerized a web application using Docker and managed source code through Git and GitHub.
 - Built automated deployment workflows using Jenkins and CI/CD principles.
 - Implemented testing, build automation, and deployment processes to improve release efficiency and reliability.
